A passionate and self-motivated Computer Science undergraduate at Bundelkhand Institute of Engineering and Technology, Jhansi. With a strong foundation in web development, I enjoy building full-stack applications that solve real-world problems. My key interests lie in frontend technologies, backend APIs, and problem-solving through Data Structures and Algorithms. Beyond academics, I actively participate in hackathons and open-source projects to sharpen my skills and collaborate with like-minded peers. I take pride in creating responsive and user-centric applications, and I'm always eager to explore new technologies, improve my coding skills, and contribute meaningfully to impactful tech-driven projects.

EDUCATION

Bundelkhand Institute of Engineering and Technology, Jhansi

2023 - 2027

Bachelor of Technology in Computer Science and Engineering

GPA – 8.80

Kaushambi Presidency School, Kaushambi

2021 - 2022

Intermediate

88.16%

PROJECTS

PodCreator | React Js, Express Js, MongoDB, Node js, Tailwind CSS - [Link](#)

- PodCreator is a full-stack web application that allows users to upload, manage, and listen to podcasts. It includes features like user authentication, podcast categorization, audio streaming, and a user-friendly interface for both creators and listeners.

Complaint Management System | React Js, Express Js, MongoDB, Tailwind CSS - [Link](#)

- A web-based platform that allows college students to submit complaints related to campus issues directly to the respective departmental administrators. The system streamlines communication, ensures proper complaint tracking, and helps administrators resolve issues efficiently.

My Notes | HTML, CSS, Javascript - [Link](#)

- Your notes website is built with HTML, CSS, and JavaScript, allowing users to access 1st-year notes in a clean and organized layout. It provides a simple and user-friendly interface for easy navigation and reading.

TECHNICAL SKILLS

Languages: C, Java, HTML/CSS, JavaScript

Technologies/Frameworks/Libraries: React Js, Express Js, Node Js, Mongo DB

Computer Fundamentals: Data structures and Algorithms, OOPs

ACHIEVEMENTS

- Achieved 2nd Runner-up position in the DevsOnLoop Hackathon “CHILLHACK” by developing an innovative web-based solution
- Received the **Best Academic Performance Award** in school, recognizing outstanding academic excellence and dedication to learning, accompanied by a certificate of achievement.
- Solved 200+ Data Structures and Algorithms (DSA) questions across multiple coding platforms

CERTIFICATION

Introduction to React Bootcamp from LetsUpgrade - [Link](#)

- The "Introduction to React" Bootcamp from LetsUpgrade provided a comprehensive foundation in React.js, covering key concepts such as components, props, state management, and JSX.
